

DID YOU KNOW

Rhinoplay is a long-term support partner of the children's charity Playground Ideas (PI). PI improves children's learning and wellbeing by helping communities in developing countries to build safe and inspiring playgrounds.

Did you know that you are building two playgrounds?

That's right. When you purchase a playground from Rhinoplay you are not only getting an incredible playground for your children but you are helping to build another one for a child in the developing world.

When Playground Ideas started asking for support we jumped at the chance because we can't think of a better, more aligned activity for us. We believe time and space to play is a precious gift for any child and there are so many children who may never get that. Growing up in the developing world is tough and often it's the children who are last to be thought of. This is a really practical way we can make a direct difference in the happiness and resilience of a child.

Playground Ideas concept is simple; they train people and help build playgrounds where there are none. Working with local builders, using only local tools and materials, every playground is unique, based on community feedback and availability of local materials. Using this method, it ensures that not only local games and customs are maintained but also that the space can be easily maintained and repaired to keep it safe in the long run.

By working with us to build a playground you are doubling your impact.

Thank you so much for your time.
