Sorting through the myriad of play ground products available and trying to make a sound investment decision in Australia is no easy task. Clients need to weigh up safety, durability, customer service and, not forgetting the end user; fun!

At **Rhinoplay**, we strive to deliver on all of these important items for our clients, and we think we do it better than any one else.

Our designers, project managers, sales people and installation quality supervisors' work together to deliver results. Our clients benefit from our combined decades of industry experience and we benefit from the growing demand our clients place on our products and services.

### Our Points of Difference

In the play industry the temptation to provide for the customer, and almost ignore the needs of the end user, children, is a constant. Attracting children to a play structure is one thing. Delivering a fun yet safe experience is totally different. At **Rhinoplay** we strive to create the most amazing play structures possible yet we never compromise on safety. Never.

### Quality

A simple yet ambiguous word that is often preached by the masses but delivered by the few. Our clients are not distracted by the old argument of where a product is or isn't made. Quality has nothing to do with origin and everything to do with standing by your products. Interestingly, it all boils down to one simple thing. Warranty.

**Rhinoplay** provides an industry leading, fully transparent warranty and we stick by it.

### Safety

The amount of misinformation in the play industry is quite astounding given the seriousness of the implications. It is all too easy to say a play structure is safe but what lies beyond these words? At **Rhinoplay**, our designers and inspectors are required to complete certified RoSPA courses at the University of NSW so that they understand exactly how to perform their duty. We test our products in Australia to Australian Standards and we can supply the test results. We certify everything we do and our clients appreciate the peace of mind this creates.

### Our Clients

**Rhinoplay** is an approved supplier to many large corporations in Australia who expect nothing but the best. To gain such approvals, **Rhinoplay** has had to demonstrate industry best practice year in, year out. All of our clients whether they be large or small, benefit from the results of this rigorous scrutiny. Many have tried but very few have achieved such recognition. We are proud of our achievements.

ACTUAL PHOTO

Winston Hills Shopping centre had a popular play area with old play equipment that desperately needed to be replaced. **Rhinoplay** designed and installed a new modern and tough play structure transforming and revitalizing a major part of the shopping centre. Mum's can now relax and enjoy a coffee while children safely play and enjoy the new equipment.

Hi Charlotte,

Mothers complained when the playground was closed on LG2 for the week and the temporary one built on LG1 which was too small and at that time there was a lot of rain, and mothers were coming into the centre.

They then loved the playground being in the food court on LG1 , so they could feed the kiddies and themselves and stayed in the centre longer.

When it was moved to L1, we had a lot of complaints it had moved again, we explained it had gone to its “home” and would stay in the children precinct. The only thing we are hearing is they can’t have lunch near the playground.

Positives, are the playground is big and better than Macquarie and Rhodes.

Regards

Leah May

### play structures

Rhinoplay can design for you a high quality and safe play structure. In fact, we have the best value for money play structures in the industry. Why not take advantage of our free design service?

### maintenance

Our qualified installers can perform all maintenance requirements in accordance with Australian Standards. In fact, we even remind you when your equipment is due for a check-up.

### safety inspections

Play equipment safety is paramount in any situation. By inspecting and repairing your play structure, we can offer you peace of mind knowing your play area complies to all relevant standards.

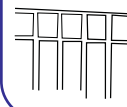

### spare parts

Many spare parts are now available from our online store. Did you know we can also provide spares for many other manufacturers not just our own structures? Can't find what you're looking for? Why not give us a call.

### upgrading

The modular design of our equipment allows us to modernise or upgrade old existing play structures. You can save thousands of dollars by upgrading rather than buying new equipment.

### fencing

Rhinoplay can design and install a high quality, safe fence to suit your every need. We have a range of custom designed corporate fencing systems as well as standard fences available in any height.

### log books

Generic playground equipment maintenance log-books can be purchased from Rhinoplay. Australian Standard 4486.1 requires maintenance to be performed and recorded. our log-books make this task fast and simple.
