## About Rhinoplay

Rhinoplay is made up of a dedicated team of design professionals who love creating interesting and innovative play spaces. We specialise in playground solutions for clients such as Quick Service Restaurants, Clubs and Hotels, Local Government & Family Entertainment Centres among others.

## Our Clients

Rhinoplay is an approved supplier to many large corporations in Australia who expect nothing but the best. To gain such approvals, Rhinoplay has had to demonstrate industry best practice year in, year out. All of our clients whether they be large or small benefit from the results of this rigorous scrutiny. Many have tried but very few have achieved such recognition. We are proud of our achievements.

## Point of Difference

In the play industry the temptation to provide for the customer, and almost ignore the needs of the end user, children, is a constant. Attracting children to a play structure is one thing. Delivering a fun yet safe experience is totally different. At Rhinoplay we strive to create the most amazing play structures possible yet we never compromise on safety. Never.

## Safety

The amount of misinformation in the play industry is quite astounding given the seriousness of the implications. It is all too easy to say a play structure is safe but what lies beyond these words? Our design team includes members with over 20 years of playground design experience, international playground designers dedicated to creating safe and fun playgrounds. We test our products in Australia to Australian Standards and we can supply the test results. We certify everything we do and our clients appreciate the peace of mind this creates.

## Quality

A simple yet ambiguous word that is often preached by the masses but delivered by the few. Our clients are not distracted by the old argument of where a product is or isn't made. Quality has nothing to do with origin and everything to do with standing by your products. Interestingly, it all boils down to one simple thing. Warranty.

## Warranty

Rhinoplay selects the best materials and products for the job. Our products will stand the test of time and kids. Rhinoplay provides an industry leading, fully transparent warranty and we stick by it.

## CUBE PLAYGROUNDS

Created specifically for commercial installations, the Rhinoplay CUBE® play system is the world's most innovative and advanced play system. The CUBE®'s clear slides, overhead cables, dedicated toddler areas and exciting activities will bring the WOW factor to your restaurant.

### Next Generation Play System

CUBE® from Rhinoplay improves upon traditional contained play equipment in every way. The genius behind the CUBE® system is our patent-pending Ball Junction technology which allows for the CUBE® to be customised to your needs, is easily updated to introduce fun new activities later on & allows for easy maintenance and updates to the frame over the years.

The sight of children flying through the clear slides and climbing the suspended cables will attract passers by into your restaurant. Children will consistently find fun, new ways to explore the CUBE® and in turn, will encourage repeat business.

### Fun For Kids, Great For Business

At Rhinoplay we recognise the importance of repeat business for our clients. It's easy to create initial interest with something new but to ensure repeat business for years to come is much more difficult. The CUBE® system is designed to achieve just that. The challenging and varied activities in the CUBE® will encourage return business, and your customers will never be bored as this flexible system allows for alterations over time to create exciting new challenges within the existing structure. Visually, the CUBE® is a striking, eye-catching structure that will maximise interest from commuters and passers by.

### Quality and Longevity

The Rhinoplay CUBE® is a meticulously engineered play system designed with quality and longevity in mind. Using the highest quality materials including rust resistant frames and scratch resistant laminates, CUBE® components are robust, durable and designed to last. Our designs can also be tailored to suit the needs of your business. Whether your space is large or small, high or low, simple or complex, Rhinoplay can design a CUBE® system that works for you. The CUBE® components are also available in a range of colours and can be customised to best represent your brand.

## VISUAL IMPACT

No other playground in the world will attract families like CUBE®. With our clear tubes, amazing variety, colour and fun, customers are reporting huge sales growth from the impact of attracting more families and keeping them longer.

## SALES IMPACT

Rhinoplay CUBE® playgrounds have been shown to provide a very positive return on investment. Businesses benefit from the increased family patronage created by our unique products, resulting in a "Profit for Play".

## ENORMOUS VARIETY

CUBE® was designed as a brand new system from the ground up. It features all new products such as climbers, slippery ramps, cable ramps, cable tunnels, dedicated toddler areas and amazing slides to thrill children of all ages. No other system available will pack more fun into your play area than Rhinoplay CUBE®.

## LOW MAINTENANCE

CUBE® is made from very robust materials to ensure many years of trouble free use. Our patented Ball Joint allows for easy removal of parts and panels, meaning CUBE® can be extended to make a bigger structure at a later date.

Parts and panels can be easily changed to repair vandalism, or simply to update to the latest products available. No need for expensive technicians to replace a panel because changing parts is just so simple anyone can do it.

## SAFETY

CUBE® has been designed with meticulous attention to detail using the highest quality materials available in order to meet and exceed:

Australian Standards AS3533.4.2  
Amusement Rides & Devices  
Specific Requirements - Contained Play Facilities

## PALETTES

CUBE® can be styled to accommodate your interior decor, themed to suit a business' brand or tailored to any particular niche desired.

## ACTIVITIES

CUBE® is packed full of play value and comes with an extensive range of unique play options.

## ACTIVITY PANELS

### Planetary Gears Panel

Planetary gears panel demonstrates to children simple gear mechanics, for all those budding engineers.

### Vortex Panel

Vortex spinning panel creates an optical illusion, and placed for easy access to toddlers.

### Transition Spinner

Create eye-catching movement & activity with an integrated spinner.

### Mix 'n' Match Panel

Easily accessible, toddlers can switch heads & bodies with the Mix 'n' Match Panel.

### Star Spinner

Soar through the galaxy with the Star Spinner.

### Squirrel Panel

The Squirrel Panel features spinning flowers & a character mirror for toddlers.

### Cubby Spinner

A fun spinner designed to compliment the Cubby palette.

### Bird Spinner

Toddlers can have fun with the easily accessible Bird Spinner.

### Space Spinner

Kids can blast into orbit with the Space Spinner.

### Tactile Toddler Panel

Toddlers' tactile panel featuring mirrors, spinners and dials for sensory play.

### Toddler Maze Panel

An easily accessible toddler activity panel, offering a fun challenge for younger children.

### Challenge Maze Panel

A challenging maze for younger children, located in an easily accessible location.

### Toddler Shape Maze

Fun & educational for toddlers, shapes can be traced to their corresponding name.

### Counting Panel

An easily accessible, fun & educational numerical activity panel for toddlers.

## PANELS

### Window Panel

Plastic window panel with integrated perforated steel allows for easy vision into the play structure, stands up to anything kids can throw at it, and needs minimal cleaning & maintenance.

### Frame Panel

Plastic window panel with integrated perforated steel allows for easy vision into the play structure, stands up to anything kids can throw at it, and needs minimal cleaning & maintenance.

### Criss-Cross Panel

Plastic window panel allowing easy vision into the play structure, stands up to anything kids can throw at it, and needs minimal cleaning & maintenance.

### Spot Panel

Plastic window panel allowing easy vision into the play structure, stands up to anything kids can throw at it, and needs minimal cleaning & maintenance.

### Metal Panels

Metal panels placed in strategic places add significant strength in high traffic, high wear areas.

### Level Numbers

Level numbers can be added to your CUBE® for a big, bold statement.

## CLIMBERS

### Easy-Access Tri-Climber

Tri-climber with variable height step for ease of access for both older & younger children. Comes with an integrated stainless steel handle to prevent falling and make climbing even easier.

### Slippery Ramp

The slippery ramp allows children to ascend & descend levels, whether it be by climbing or sliding.

### Crawl Tunnels

Big, bright & robust crawl tunnels allow kids to traverse through CUBE® with ease.

### Vertical Climber

Vertical climbers allow for quick & easy access between levels, while offering clear sight lines for parental supervision.

## COCKPIT OPTIONS

### Jumbo

Kids can soar through the sky in the Jumbo. Moulded cockpit seats allow children to play as pilots & cabin crew, flying their way through the clouds.

### Helicopter

High-flying fun for kids of all ages, the helicopter allows children to role play. The cockpit features 2 moulded seats for both pilot & co-pilot.

# SLIDES

## Toddler Slide

Toddler slide placed for easy access and supervision of younger children.

## Sweeping Slides

Available in a range of sizes & variations. Transparent tubes can be added to sweeping slides, allowing children to be seen while sliding.

## Spiral Slides

Available in a range of sizes & variations. Transparent tubes can be added to allow children to be seen while sliding.

3 Level Sweeping Slides

4 Level Sweeping Slides

3 Level Spiral Slides

4 Level Spiral Slides

Transparent tubes available in half & full tube options.

5 Level Spiral Slides

6 Level Spiral Slides

## Moulded Tube Inlays

Bright, bold & modern, moulded tube inlays enhance your cube's palette, appearance & curb appeal.

## CABLE PLAY

### 1 Metre Cable Tunnel

A suspended 1 metre cable tunnel creates a fun, challenging obstacle for children to conquer.

### 2 Metre Cable Tunnel

A 2 metre cable tunnel placed high overhead creates a challenging, fun obstacle for children to overcome.

### 2 Metre Angled Cable Tunnel

An angled 2 metre cable tunnel placed high overhead, creating a fun obstacle for children to navigate their way through.

### 1 Metre Cable Bed

A suspended 1 metre cable bed allowing kids to balance, interact and play, while refining their motor skills.

## LED LIGHTING

### LED Light Panel

LED lighting panels can be incorporated into your CUBE® as seen on the adjacent page. The panels react to a child's touch, creating different patterns to keep children engaged.

## **GLOW** **INTERACTIVE LIGHTING SYSTEM**

The GLOW Interactive Lighting System will take your play space to the next level. Interactive sensory elements in the play system allow children to engage, explore & immerse themselves in their surroundings.

A child's touch can trigger a variety of patterns in the lighting sequence, encouraging repeated engagement and curiosity.

Additionally, GLOW acts as a beacon to potential new customers passing by your venue.

## AUSTRALIAN STANDARDS

CUBE® has been designed to conform, where applicable, to the following Australian and New Zealand Standards:

AS 3533.4.2 - 2013  
Amusement Rides & Devices  
Part 4.2: Specific requirements – Contained Play Facilities.

## TESTIMONIAL

"To whom it may concern,

I am writing to share my experiences with Rhinoplay in my restaurants. Ryan Gillatt and I have worked closely together over the past 15 years in building bigger and better playlands. Ryan has provided outstanding services to ensure we have the best outcomes for my business.

Ryan has always been honest and transparent in offering great playlands to give me the best return on investment in maximising sales.

My dealings with Rhinoplay have all been positive as they provide great products and fantastic service. Ryan has personally come to visit me in both my restaurants pre work and post work to follow up on installation and answer any questions or enquiries I might have and fix any defects I might have.

In the past 12 months I have installed a giant duel Rocket and cube in my Mount Druitt restaurant in September 2016 and a huge 6 level Cube in my Plumpton restaurant July 2017. With the installation at the Mount Druitt restaurant, sales have increased significantly with front counter sales comping over 15%.

In both my restaurants the customer feedback has been overwhelming with so many complements in the look and size of the playlands and it's like coming to lollypop land without paying the entry fee.

I will continue to use Rhinoplay in the future and I highly recommend any Licensee or McCopco restaurants to use them.

If you would like any further information please don't hesitate to contact my Supervisor Paul Salamakis on 0438 209 097 or myself on 0416 209 097."
